
CS 346: Sprint 1 Meeting 1 Minutes

Date: February 12, 2024

Team: 101-6

Present: Jeff Chiu, Alvin Hu, Siddhardh Palaparthi, Riley Shortt

Absent:

Agenda

Discussion of goals and priorities for the first sprint.

Notes

We noted that it would be easier to design and plan out a dating app if we had an idea of what the basic “profile” – the building block of our app would look like, then subsequent development decisions could be taken from there as we add features.

Decisions

The group decided to work on frontend design and layout for the basic profile created by users and shown to other users on the UWRizz dating app, comprising of a “main” page for each

user and subsequently a chat page, preferences page and likes page.

Actions

We decided to do the UI designs and layouts for each page of a user profile and assigned the work as following with a deadline of 10am on the day of the sprint demo presentation (February 16th, 2024):

- Chat page – Siddhardh
- Main page – Jeff
- Profile/Preferences page – Alvin
- Likes page – Riley
